

Expert Systems for Teachers[®] Series 2015-16 enrollee comments

Many positive comments have been received from enrollees in the Expert Systems for Teachers Series of courses. The following are representative samples.

"I am replying to your email in confirmation that I have received all instructions. I just want to say thank you so much and that I had absolutely no idea that the instructor materials were this comprehensive! Truthfully I have been struggling with how to pace and present all of the IGCSE History content for my class, so I think these materials are exactly what I need."

"I just wanted to let you know that I received the AP Physics course material break and I will be working on that to prepare for the exam. TODAY I received the Physical Science material and I am DELIGHTED with it to help ease the rest of the year of teaching that course. It looks spectacular and I am most grateful to have it since our school doesn't even have a textbook. I nearly jumped for joy as I looked at it. I am a curriculum writer and have done research on curricula at NYU and FSU and this is the type I write (my work has been in HS Biology and in elementary science). Thank you so much."

"I Passed my FTCE/ESE Exam! I'm so excited! Thanks again for the and for recommending using the study guide. That study guide did the trick; I focused only on the study guide. I read it from the front cover to the back, and passed. Thanks!!!!"

"Thank you for all your help. I sat the FTCE exam and I have passed it, thanks to all the materials you sent me. I used them in my classes and studied them extensively."

"Thank you again for all that this grant provides for us; I am an English teacher taking on a Geometry period this year! Crazy times..."

Comments: The following are comments received in conjunction with the survey conducted among enrollees:

Survey Response Text
This is a fantastic service to teachers. I found myself in a very stressful situation, and this program helped me tremendously! I am very grateful for this opportunity!
The whole program is a game changer. The materials are very good exciting, helpful and user friendly. You just can't ask for more!
Thank you for this wonderful opportunity especially since it will ultimately impact the student's academic growth.
Very helpful in creating a framework for my class. Labs worksheets were very helpful. The PowerPoint's were a good starting point, but required an enormous amount of time to fill them with enough content (and notes) to provide an adequate lecture. The exams were very helpful. There were some questions that seemed to be very detailed but were not explicitly covered in the PowerPoint's. But it did save me a lot of time having a framework for the exam to work with.
For a teacher overwhelmed with myriad obligations while trying to go above and beyond for students, it was a great blessing to have this support and know it was always there to go above and beyond for me as a teacher. Without question this outstanding assistance will translate into more help for and production from my students. With great appreciation...
Thank you for the opportunity to complete this course. I do feel better prepared for the exam. Again, thanks for allowing me to be a part of this program.
The subject content was very helpful especially when preparing lessons.
This program is awesome for the further development of teachers and is a support to the needs that we have in subject area
This program was very helpful. To me teaching civics, world and us history for the first time. Thanks for eliminating most of the prep work for civics.
The course materials are comprehensive and user friendly.
Excellent program. Please continue/expand.

Expert Systems for Teachers® Series 2015-16 enrollee comments

Really don't like that the deadline for the post test was changed to before our district was even out of school. Was planning on completing after June 5th to prep for my cert exam while completing post test
I love the program. Teaching Point classroom materials are awesome.
The materials provided are great. I just used them for bits and pieces since I was teaching AP physics.
I truly appreciate the Florida Expert Systems for Teachers. It's a great resource and very useful program that I am highly recommending to any of my fellow colleagues/friends in need of its expertise and/or services.
Best test prep ever! Thanks! May have to use you again in a year or so for the Math cert.
I appreciate the resources to prepare me to be a better educator for my student it was a helpful tool necessary for achievement.
This program helped me to become a better prepared teacher and the impact shows in my students' response to my knowledge of the content. This program has changed my life for the better.
The study guide and materials were extremely helpful...I PASSED the FTCE...first try!! Thanks for the grant! Much appreciated!
All of the resources are helpful towards my student's understanding and development.
I was able to use the lessons daily with my students. The quizzes were quick and helpful.
Paying for the test is helpful as teachers in my county are woefully underpaid and the test is cost prohibitive.
This is a great program for teachers.
Thanks!!!! This is wonderful!
I am beyond grateful. I am so excited to have help.
First, I would like to thank you for your courtesy, patience and taking the time to provide me with information about this wonderful program that is a priceless gift to any teacher. This is the first time I have heard of a program that provides EVERYTHING a novice or senior teacher needs to facilitate learning for their students. (With this program) there is No additional work required but rather more time to focus on the students. It's wonderful! I am nearing the time to renew my teaching certificate and for months I had been trying to figure out how to cover the cost to complete the credits required to do so. I was praying to God this morning and he led me to you.
Thank you for your help. The learning binders have been a true life saver. I appreciate the program and the help that it is providing for teachers. Thank you so much!
